

## Task 4 - Numbers to 100 - Bonds to 100

We have looked at our number bonds to 10 lots. These are pairs of numbers that add up to make 10.

$$0 + 10 = 10$$

$$10 + 0 = 10$$

$$1 + 9 = 10$$

$$9 + 1 = 10$$

$$2 + 8 = 10$$

$$8 + 2 = 10$$

$$3 + 7 = 10$$

$$7 + 3 = 10$$

$$4 + 6 = 10$$

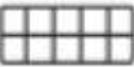

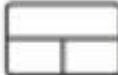

$$6 + 4 = 10$$

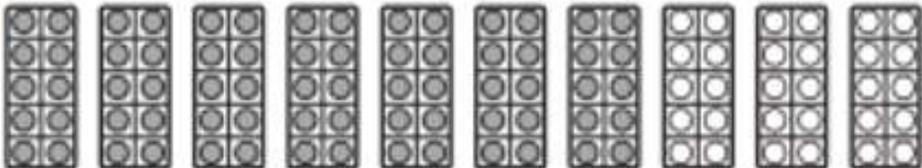

$$5 + 5 = 10$$

We can use these to help us find number bonds to different numbers. For example:

We know that  $4 + 6 = 10$ . Therefore, we know that  $40 + 60 = 100$ . This is just multiplying everything by 10!

### Should Do

Use the   to help you write the number bonds to 100.

a) 

$$\square + \square = 100$$

b) 

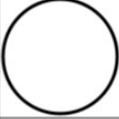

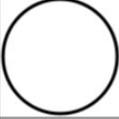

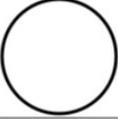

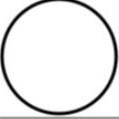

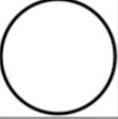

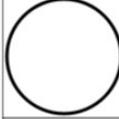

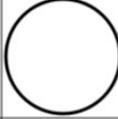

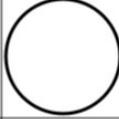

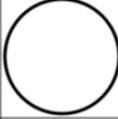

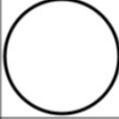

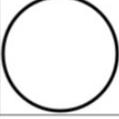

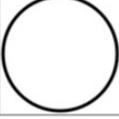

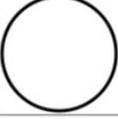

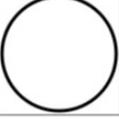

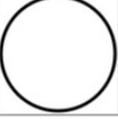

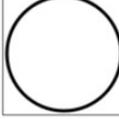

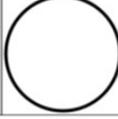

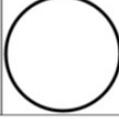

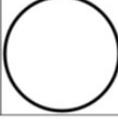

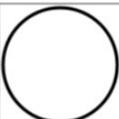

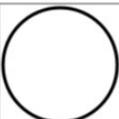

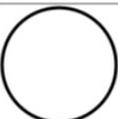

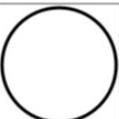

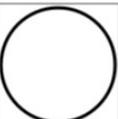

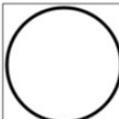

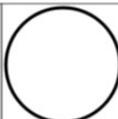

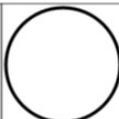

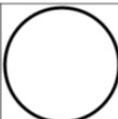

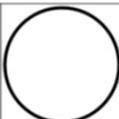

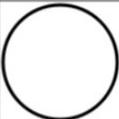

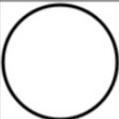

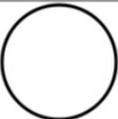

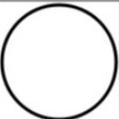

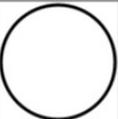

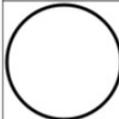

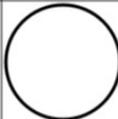

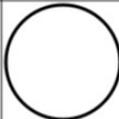

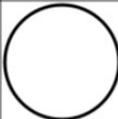

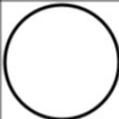

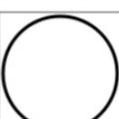

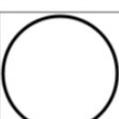

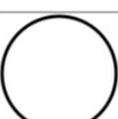

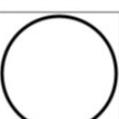

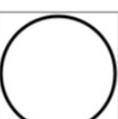

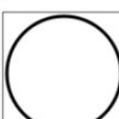

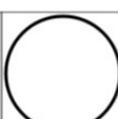

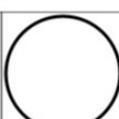

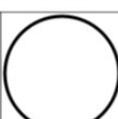

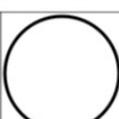

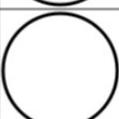

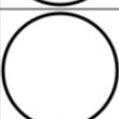

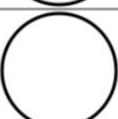

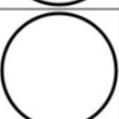

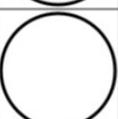

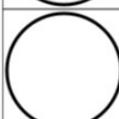

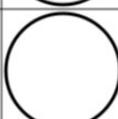

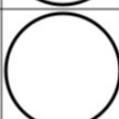

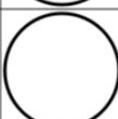

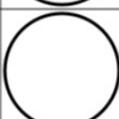

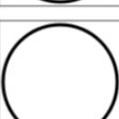

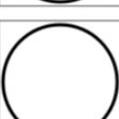

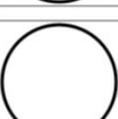

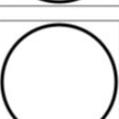

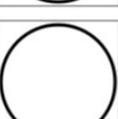

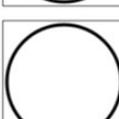

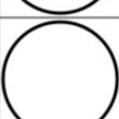

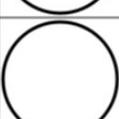

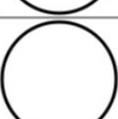

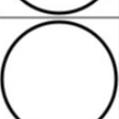

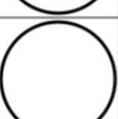

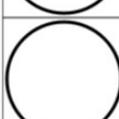

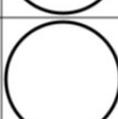

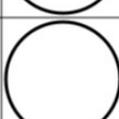

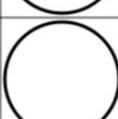

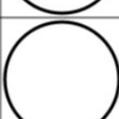

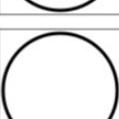

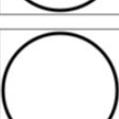

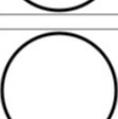

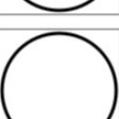

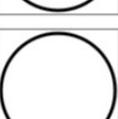

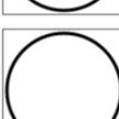

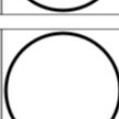

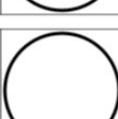

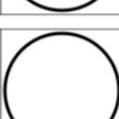

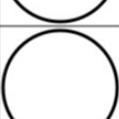

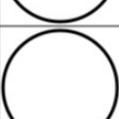

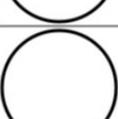

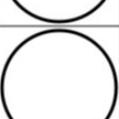

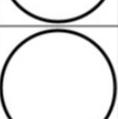

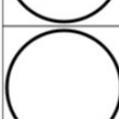

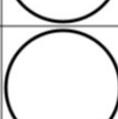

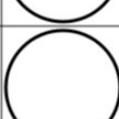

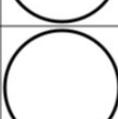

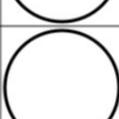

100	
60	?

$$\square + \square = 100$$

Could Do

Colour in some of the  to show the bond to 100.

$$20 + 80 = 100$$

Can Do

Complete each number fact.

$40 + \square = 100$

$50 + \square = 100$

$30 + \square = 100$

$0 = 100 - \square$

$100 - \square = 10$

$100 - 20 = \square$

Hint: Remember to use your number bonds to 10 to help you!
